PROFESSIONAL PROFILE

Entry-level IT Technician with hands-on experience supporting Windows, macOS, and Linux systems. Built and maintained a personal home lab focused on networking, VPNs, DNS filtering, and web hosting. Known for strong troubleshooting skills, clear technical documentation, and reliable user support. Seeking an IT Technician, Computer Support, or Help Desk role.

PROFESSIONAL EXPERIENCE

WEB / TECH INTERN

National STEM Honor Society | Remote

June 2023 - October 2023

Supported web and technical initiative in a remote professional environment, assisting with trouble shooting, documentation, and technical task while collaborating with team members.

- Assisted with technical setup, debugging, and maintenance of web-related systems
- Gained hands-on experience working with real-world technology tools and workflows
- Supported documentation of processes, updates and technical workflows
- Collaborated with team members in a remote setting using email and scheduled meetings
- Helped organize and track tasks and deliverables across multiple ongoing projects

CLASSROOM TECHNOLOGY SUPPORT VOLUNTEER

Seasonal Volunteer | Fort Bragg, NC

June 2014 - Present

Provided hands-on technical support in classroom environments, assisting with setup, maintenance, and troubleshooting of educational technology while supporting teachers in real-time learning settings.

- Supported teachers and students by troubleshooting basic hardware, software, and connectivity issues
- Assisted with setup, configuration, and breakdown of classroom technology including smart boards, projectors, and computers
- Helped prepare classrooms for instruction by ensuring devices, cables, and peripherals were functional and properly connected
- Collaborated with staff to maintain organized, tech-ready learning spaces
- Developed customer-facing support skills by explaining technical concepts clearly to non-technical users

PROJECTS

Home Lab (Personal Project)

2025 - Present

Built and deployed a personal portfolio website and documented home lab projects including VPN setup, DNS filtering, and web hosting.

- Configured Wire Guard VPN, Pi-hole DNS filtering, and NGINX-based web hosting within a personal homelab environment
